Business Solutions

Managed Services

Whether public access WiFi is an amenity or core to your business or service offering, you need it to be easy to use and to work flawlessly every time.

Managed Wi-Fi Service

Proactive monitoring and maintenance of Wi-Fi network health. Includes technical and end-user support from a highly-trained support staff and access to an analytical dashboard of network metrics.

Managed Network as a Service (NaaS)

Add-on this to Managed Wi-Fi for proactive monitoring and holistic maintenance of network health. Includes integrated support, including custom client-facing dashboard design.

Start to finish, end-to-end management, backed by more than 25 years of global experience. The only acceptable level for Wi-Fi is excellence.

Managed Wide Area Network (WAN)

For organizations with several locations or the need to simplify the management of their WAN and Internet services. Can include global connection and service management for multi-national clients.

Support Services

Remove the stress from your internal resources and enhance the user experience by offering a dedicated support team. Bilingual support services are available 24/7/365 through telephone or email.
