TENANT, GUEST AND ADMIN WI-FI

We offer carrier-quality Wi-Fi for residential, commercial, and multi-use buildings. Our patented solution offers your tenants a competitive service without the hassle of working with multiple carriers. Use the administrative network for internal operations products to save cost and error.

OPTIONAL PROFESSIONAL ENTERTAINMENT PACKAGE

Our optional full service entertainment package offers your tenants TV, guest Wi-Fi and IP based phone systems with a single provider nation-wide in Canada and the USA. Our professional management solutions ensure consistent and reliable service for your tenants, just like a high-end hotel.

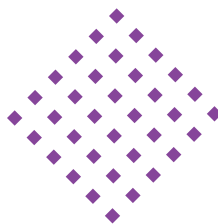

PROFESSIONALLY INSTALLED, MANAGED AND MONITORED

We have a cross country network of technicians, supported by our North American service desk of knowledgeable and experienced employees. We offer on-site assessments of your building to advise you best to offer a seamless installation, management and support experience.

Solution Benefits

MDU Network and Wi-Fi Services from SolutionInc

OUR BUILDING APPROACH

Whether you manage or own a vacation rental, apartment building, hotel or senior care facility, we install our services like any other Internet service provider. We will enhance the service options in the building even if you only operate in a percentage of the units.

Our Support Services provide your tenants with a 24/7/365 help desk to help them get connected and your team members on the ground with technical assistance to ensure maximum uptime and a timely remedy for issues.

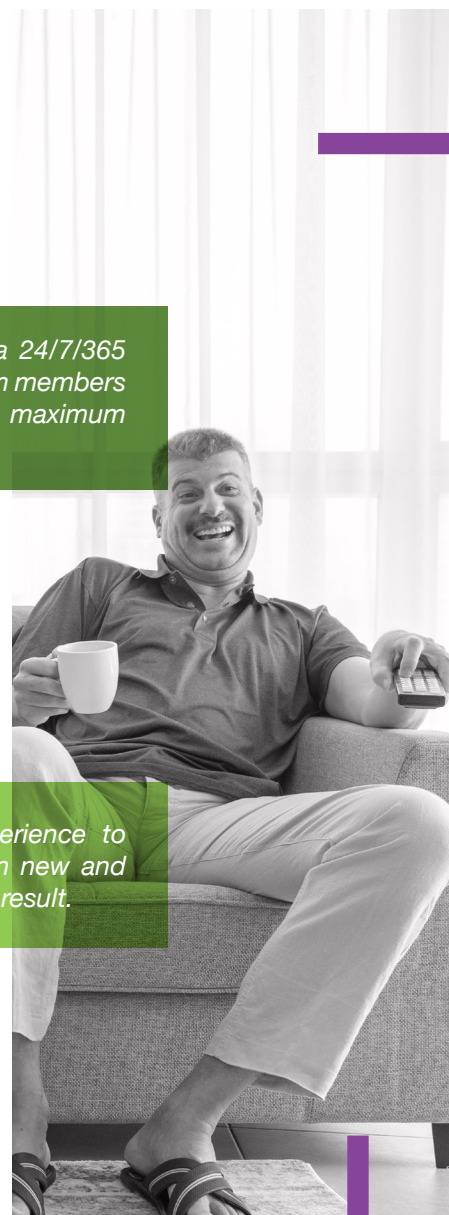

SMART BUILDING TECHNOLOGY INTEGRATION

From sensors, to door locks, IP cameras, and other IoT technologies, our networks are built and configured in a way to support and secure your business operations. Allow us to consult on your other technology requirements.

Our talented and dedicated staff have the experience to scope, quote, and implement complex projects in new and existing buildings to ensure you have a quality result.

INSTALLATION AND MANAGEMENT SERVICES

We take a holistic approach to understanding your business objectives and tenant experience goals and match those with our technology. Our services, experience and partner network outnumber the traditional residential service offering.
