SolutionInc

SolutionIP FLEX[®]

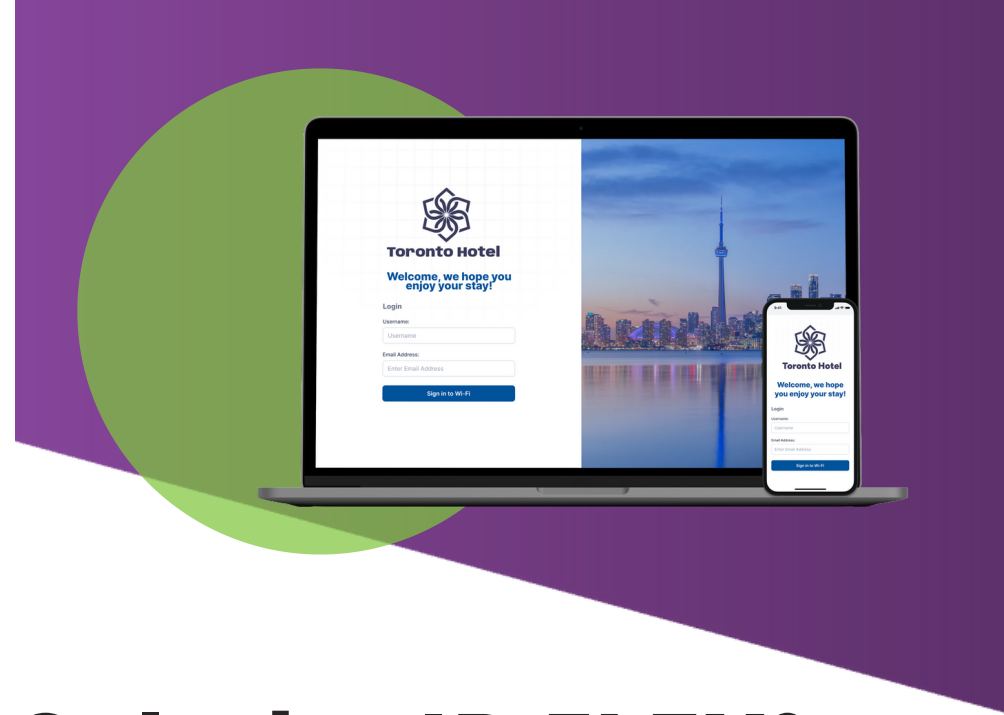

About SolutionInc

We were founded in 1997 in Nova Scotia, Canada with the vision of providing simple access to the Internet on public networks.

Today, we provide world-class managed Wi-Fi technology solutions for hospitality, vacation rentals, enterprise, healthcare, campuses, student housing, multi-dwelling units, senior living facilities, and more. With our patented solutions and experienced staff, we have the knowledge and expertise to assist you in creating outstanding Wi-Fi user experiences in any vertical where a guest, corporate or public Wi-Fi network is required.

Your problems. Our solutions.

SolutionIP FLEX®

Our gateway is the link between your Wi-Fi network and the Internet. It gets people online effortlessly, while offering you flexibility in your network configuration.

Our captive portal functionality creates a world-class user sign-on experience. Easy to install and manage, it provides multiple options to customize your Wi-Fi offering to your industry and brand.

We help you generate revenue and cultivate happy customers with SolutionIP FLEX®.

Our patented bread & butter.

Management Features

In Cloud or On Premise

Take your pick from our centrally managed cloud solution to manage deployments anywhere, or install our software a tradition on-premise offering. The choice is yours.

Hardware Agnostic

We've integrated with the world's leading hardware and we can integrate with yours. You can make decisions based on business needs, availability and performance.

Robust Security Features

Full integration of the latest security updates for Heartbleed, Bash Exploit, Poodle Exploit and NTP DDoS have been included. Additional security enhancements to support protocols such as full TLS support.

Analytics Engine

Whether you have a single site or multiple, knowing how your users are consuming data and moving throughout your space gives you the power to make actionable business decisions.

Flexibility & Capacity

We place no limit on the size or number of your customer networks. From a single access point to thousands, FLEX will outperform the competition without a sweat.

Single Sign-On

Utilize existing staff directories and login credentials by connecting your internal systems to our login functionalities.

Simplified Management

Centrally manage multiple locations, logically group service domains, utilize common themes and marketing materials. We make your Wi-Fi network management easy to set-up and control.

User Features

Remember Me

Wi-Fi access convenience for your guests with “remember me” functionality. They won’t have to authenticate their devices every time they return to your venues.

Multilingual Features

Our products are customizable for any languages you need for your markets. Users access the Internet regardless of their language or accessibility needs.

Roaming

Guests can wander all around your property and never have to re-authenticate as they seamlessly switch between access points.

Fairness of Service

Offering various bandwidth control services ensures that certain users are not bandwidth hogs, which can cause frustration for others.

Flexible Authentication

Choose how to seamlessly authenticate your users. Social media platforms, access codes, requiring email addresses, forcing terms and conditions acceptance - the options are limitless.

Integrations

IoT

Enable IoT devices like smart monitoring thermostats or noise sensors. We provide you with tools to enable network segregation, access restrictions and bandwidth control.

APIs

A full suite of APIs allow direct connection to your existing systems, or anything new you want to add.

Marketing

We'll customize a seamless integration into your marketing platform of choice to communicate to your users and grow your brand quickly and easily.

PMS

We are one of the largest PMS (Property Management System) integrators in the industry. We know how important it is for user information to flow freely between your management system and Wi-Fi networks.

Design

Theme Manager

Choose from our pre-made themes to easily get your captive portal up and running quickly.

Custom Design

Everything from look and feel to welcome messaging, advertising, languages, and so much more.

Responsive Design

FLEX is responsive. Whether it's your back-end and dashboard or your guests' Wi-Fi login screen,

Unique Features

Multi-homing

Add safety and increase reliability by using multiple internet connections to help mitigate risk of downtime. The redundant connection will be brought online automatically.

Fail-Safe

Our hot standby system provides continuity of Internet service by automatically bringing the identical backup server online immediately in the case of failure.

Conference Creo

Make meeting room network management easy. Empowers IT staff to plan, configure and deploy customized network settings for each conference through an easy-to-use tool.

Exhibitor Connect

Our self-managed portal allows conference exhibitors to add and remove their own devices on a private network group, including headless devices like printers.

Private Network Groups

Private Network Groups (PNGs) provide a self-serve portal giving users a secure Wi-Fi connection while allowing them to onboard and manage their own devices.

StudyFi

This solution gives students an "at-home" device management experience while providing rock-solid and secure Wi-Fi access.

Dynamic Pre-Shared Keys

Simplify network onboarding while maintaining the safety of segregating users by providing them with a unique network passkey only for them.

Our Mission

We believe in simplifying the complex nature of network technologies by providing a globally-trusted, secure and diverse suite of products.

Our Vision

We want to nurture innovation, trust and diversity amongst our team to create unique solutions to changing market needs.
