

Network Assessment & Survey

Looking to understand the current state of your network? We analyze your network and provide insight, helping you make decisions to mitigate risks and improve your network. This includes recommendations and a blueprint to optimize network efficiencies and network visibility to provide seamless access.

Network Design

A design plan that provides information and details on your ideal wireless network. This includes the recommended equipment and activities to meet the design criteria and expected outcomes, and to maximize investment. We offer a flexible variety of surveys to suit every business size & budget.

Network Implementation

Typically included with one of the previous services, this is for organizations requiring project management to coordinate and oversee Wi-Fi and Network deployments in a high quality and timely manner. Our project managers consider your installation holistically, ensuring a complete end-to-end solution

SolutionInc

Wi-Fi & Network Managed Services

Our managed services provide start to finish, end-to-end visibility and management, backed by more than 25 years of global experience in the Wi-Fi and networking business.

We will work with you to build your Wi-Fi action plan and then provide excellent management services to ensure your users and IT team have a seamless experience.

Managed Wi-Fi

Professional management of your Wi-Fi network ensures reliability, stability and business-quality Wi-Fi for the end user, with the added peace of mind for the IT team.

With our experience in unique and global deployments, this Managed Wi-Fi service allows any organization to focus on and grow their business.

Proactive Monitoring & Maintenance

Up-to-date Hardware and Software

24/7/365 Help Desk via Phone or E-mail

Private Network Groups

Our self-serve portal provides a secure Wi-Fi connection to users and allows them to onboard and manage their own devices, eliminating network support complaints and empowering users to manage their own secure private network.

This service is ideal for settings where many individuals share a common network infrastructure. It can also be integrated with Dynamic Pre-Shared Keys.

Managed Network Service

Our professional, proactive managed network service will monitor, maintain, manage, and provide support services to your organization and their staff.

This service ensures that the network is continuously operating at its highest capacity and is up to date with all relevant technologies. This may be a follow-up to a network deployment service and/or a handoff from an existing organization network.

Why Choose SolutionInc?

- 1** We understand how your professional equipment relies on your network infrastructure.
- 2** We use professional site survey equipment to ensure the highest quality.
- 3** We have been commercially offering site services for more than twenty years.
- 4** We know how difficult technology can be for people and we strive to make it easy.
- 5** Our staff is professionally trained, giving you confidence in our services.
