

Network Assessment & Survey

Looking to understand the current state of your network? We analyze your network and provide insight, helping you make decisions to mitigate risks and improve your network. This includes recommendations and a blueprint to optimize network efficiencies and network visibility to provide seamless access.

Network Design

A design plan that provides information and details on your ideal wireless network. This includes the recommended equipment and activities to meet the design criteria and expected outcomes, and to maximize investment. We offer a flexible variety of surveys to suit every business size & budget.

Network Implementation

Typically included with one of the previous services, this is for organizations requiring project management to coordinate and oversee Wi-Fi and Network deployments in a high quality and timely manner. Our project managers consider your installation holistically, ensuring a complete end-to-end solution

About Us

We were founded in 1997 in Nova Scotia, Canada with the vision of providing simple access to the Internet on public networks.

Today, we provide world-class managed Wi-Fi technology solutions for cities, hotels, campuses, student housing, multi-dwelling units, senior living facilities, and more. With our patented solutions and experienced staff, we have the knowledge and experience to assist you in creating outstanding Wi-Fi user experiences.

Helping you optimize your network is what we strive for every day.

Your problems, our solutions.

The Business of Public Wi-Fi

Providing an affordable access solution that provides stable and reliable connections is important to any public venue. Use free Wi-Fi access to drive traffic to slow areas, provide access codes at visitor information centres to increase engagement, promote businesses and organizations using Wi-Fi marketing solutions, or offer mobile transit hot-spots to allow commuters to work on the go.

Alternative Solutions

Whether your park is in a remote area, your boardwalk features difficult weather patterns, or your venue requires high-throughput for short periods of time, we will create a network solution that fits your needs.

We have extensive experience with complex deployments and our team is educated in providing the right solution for your unique circumstances.

Why Public Wi-Fi?

Cities today need reliable public connectivity to support:

- 1 Tourism & downtown engagement**
- 2 Digital inclusion for residents**
- 3 Events, festivals & waterfront activities**
- 4 Local business growth**
- 5 Smart-city infrastructure (meters, lights, sensors, and more)**

Municipal Wi-Fi isn't just internet, it's a platform for civic innovation.

Client Testimonial

"We (City of Stratford) had a mix of objectives and goals. SolutionInc listened and understood our goals. SolutionInc provided the perfect platform and support model to achieve our goals."

- Paul West, Business Development Manager, Rhyzome Networks
