

Property Management System (PMS) Interface Solutions

Do you need a solution to interconnect your POS, etc. to your PMS or multiple to PMS'?

One connection with us allows you to connect multiple solutions: PMS, IPTV, hospitality TV system, POS, guest folio access for a more customized guest experience, and more!

Guest Data Integration

Allows systems to query check-in/check-out dates and validate guest names and room numbers.

TV-Based Systems

Enables guests to perform actions like checking out directly through their TV.

Flexible Connectivity

Can connect to property-based servers or cloud-based PMS solutions.

STB Support

Pushes real-time room status and guest details to Set-Top Boxes via multicast streams or APIs.

Direct Connection

Can connect directly to a PMS server via Ethernet or a serial port for a solid, direct connection.

Switches & Multiplexers

Communicate through standard network switches or third-party connection boxes, such as a Control box, to manage data traffic.

Simplify your solutions. Connect the things that make your business run.
