

SolutionIP
zen
cloud controller

SolutionIP Zen is our centralized cloud management portal for your fleet of SolutionIP gateways. It's centrally-managed so you can run your network from anywhere.

Rapid Deployment

Fast setup, whether it's one site or one hundred.

Upgrade Management

Upgrade all your properties to newest version of FLEX® or FLEX® Lite all at once.

Configuration Management

Create new sites with speed and ease. Use templates to automate the process.

Templates

Templates can include settings like LAN configuration, global settings, service locations, service domains, payment and billing settings, and more.

Operations Management

Make quick and easy configuration changes across multiple properties, like a new splash page or a pricing change.
